

Birdchaser™

The call of the wild working for you

- Emits The Sounds Of Hawks And Owls
- 2 Modes Of Operation: Motion Detector And Timed Interval
- Automatically Shuts Down At Night
- Safe And Environmentally Friendly
- May Be Effective Against Some Common Rodents

Utilize nature as a powerful defense against pesky and unwanted birds. Precision engineered to mimic the predatory sounds of hawks and owls, the Birdchaser™ scares pests off your property. Sea gulls, crows, blackbirds, pigeons and even some common rodents will all flee in terror. A motion detector mode triggers the hawk signal if any movement is sensed in a 130° area up to 30 feet. A timed interval mode can be set to produce the signal in adjustable periods of 5 to 30 minutes. The unit is equipped with a photocell that automatically shuts the unit down when it gets dark, as the activities of most birds cease. Hands down, the Birdchaser™ is the most effective and environmentally friendly bird deterrent on the market.
