

**SaniDate**<sup>®</sup>  
DISINFECTANT

## ENVIRONMENTAL DISINFECTION & SANITIZATION GUIDE

SaniDate Disinfectant is a high-power sanitation product for the animal health, livestock, and dairy industry. SaniDate's activated peroxygen chemistry is a reliable alternative to formaldehyde, heavy metal copper, chlorine, and iodine products.

SaniDate is EPA approved and highly effective against many fungal and bacterial disease organisms such as *Salmonella*, *Listeria*, *E. Coli*, *Klebsiella*, *Staphylococcus*, and other Gram Negative/Positive Bacteria. SaniDate is also broadly labeled for disinfection of equine, swine, and poultry operations.

### PROTECT YOUR ENVIRONMENT:

SaniDate has an oxidative mode of action that provides immediate control of bacterial, fungal and mold organisms and spores present in the environment. SaniDate may be sprayed, foamed or fogged to keep all of the following locations disease-free:

<b>Animal Hospitals</b>	<b>Poultry Premises/Hatcheries</b>
<b>Feeding/Watering Equipment</b>	<b>Stalls</b>
<b>Kennels</b>	<b>Veterinary Clinics</b>
<b>Livestock Quarters</b>	<b>Zoos</b>

### FEATURES & BENEFITS OF SANIDATE:

- Immediate Knockdown and Kill of Human and Animal Disease Organisms
- Environmentally Responsible Chemistry
- No Harmful Residue or Runoff
- Zero Hour REI for Humans and Animals

# SANIDATE DISINFECTANT APPLICATIONS

## ANIMAL HOUSING FACILITIES: (BARNS, KENNELS, HUTCHES, COOPS, STALLS & PENS)

SaniDate Disinfectant protects against a wide range of bacterial and fungal diseases present in animal raising environments. Use SaniDate Disinfectant to lower incidents of infection, increase milk grading and payout, eliminate bacterial and fungal disease outbreaks, and improve overall herd health conditions. Spray animal bedding, hard surfaces and mats with SaniDate Disinfectant solution as needed for surface disinfection.

<b>Heavily-Soiled, Hard, Non-Porous Surfaces</b>	<b>2.6 fl. oz. of SaniDate Disinfectant per Gallon of Water</b>
<b>Lightly-Soiled, Hard, Non-Porous Surfaces</b>	<b>1.3 fl. oz. of SaniDate Disinfectant per Gallon of Water</b>

## FOOTBATHS:

Prevent build up and cross contamination of disease by utilizing SaniDate Disinfectant in footbaths and in high traffic areas.

<b>Footbaths and Walk-Through Trays</b>	<b>1.3 - 2.6 fl. oz. per gallon of water</b> <i>Use higher rate for heavily soiled loads</i>
<b>Foaming</b>	<b>2 - 4 fl. oz. per gallon of water</b> <i>Mix with foaming solution and follow directions as specified by foam manufacturer</i>

## TRANSPORTATION AND EQUIPMENT DISINFECTION:

Prevent the spread of disease between animal raising operations by disinfecting equipment and materials used to handle, transport, and store cattle, poultry, and swine.

<b>Heavily Soiled Equipment and Materials</b>	<b>Pre-clean with soap and water. Create a solution using 1.3 fl. oz. of SaniDate Disinfectant per gallon of water. Saturate all surfaces for 10 minutes.</b>
