

CESSPOOL – SEPTIC TREATMENT

Organica Cesspool Septic Treatment is an industrial strength product specifically formulated to keep septic systems running at maximum efficiency. Typical systems are inundated daily with feces, paper, hair, detergents, sanitizing agents, fats, grease and other environmental pollutants. An influx of these complex substances can adversely affect the delicate balance of indigenous microorganisms in the system, rendering the system inefficient.

In response to this everyday problem Organica Technologies developed Cesspool – Septic Treatment a unique multi-faceted formula designed to keep septic systems trouble free. This all natural product contains a broad spectrum of naturally occurring microorganisms that are highly efficient at producing hydrolytic enzymes to catalyze the hydrolysis of cellulose, starch, protein, fat, oil and other environmental pollutants such as hydrocarbons, phenols and detergents. The microbial portion of the formula drastically reduces solids within the system, which permits the effluent to percolate into the leach field thereby reducing the incidence of backups.

Regular use of Cesspool – Septic Treatment will improve efficiencies within the system by promoting maximum biodegradation, which in turn prevents clogs and backups from occurring. The product is effective under a wide range of environmental conditions and is extremely cost effective. Cesspool – Septic Treatment is free of acids, lye and petroleum solvents it is safe for use in all types of systems and it is non-corrosive, non-caustic and environmentally friendly.

DIRECTIONS FOR USE

INITIAL APPLICATION:

Pour 4 oz / 8 tbs. of product down toilet & flush

SECOND APPLICATION:

Two weeks later pour 4 oz / 8 tbs. of product down toilet & flush

MAINTENANCE DOSE:

Thereafter pour 2 oz / 4 tbs. of product down the toilet every two weeks.

Apply product at the end of the night after baths, showers & dishwasher for maximum efficacy.

ACTIVE INGREDIENTS

A proprietary blend of 58 strains of naturally occurring, non-pathogenic, non-genetically altered bacteria, enzymes and microbial nutrients.
