

Apply GreenClean Granular to any listed water and surface sites.

APPLICATION SURFACES INCLUDE:

Contained Water Surfaces: Water Gardens, Fish Ponds, Ornamental Pools/Ponds, Ornamental Waterfalls, Fountains, Bird Baths, and Standing Water

GreenClean Granular is not intended for use in drinking water.

Non-Painted Surfaces: Floors, Walkways, Storage Areas, Patios, Decks, Railings, Roofs, Asphalt Shingles, Siding, Fiberglass, Stairs, Ramps, Ground Cover Mats, Weed Control Mats, Concrete, Brick, Tile, Slate, Granite, Statues/Monuments, Outdoor Furniture, Tennis Courts (non-grass), Shorelines, Gravel, Under Benches, and Other Non-Painted Surfaces

DETERMINING WATER VOLUME

Measure length (L), width (W), and average depth (D) in feet (ft) or meters (m) and calculate volume using one of the following formulas:

Square/Rectangular:
L(ft) x W(ft) x D(ft) x 7.5 = Gallons
L(m) x W(m) x D(m) x 1000 = Liters

Circular/Elliptical:
L(ft) x W(ft) x D(ft) x 5.9 = Gallons
L(m) x W(m) x D(m) x 786 = Liters

APPLICATION RATES

Water Rates:
1 teaspoon – 16 Tablespoons of GreenClean Granular per 1,000 gallons of water.

Non-Painted Surfaces:
1 – 3 pounds of GreenClean Granular per 1,000 square feet of area.

Measurement Conversions:
1 pound = 2 Cups • 1 Cup = 16 Tablespoons • 1 Tablespoon = 3 teaspoons

GENERAL TREATMENT NOTES

- Control is most easily achieved when growth is not yet well established. Treat when growth first begins to appear.
- GreenClean Granular is water activated. Watering before application is preferred over misting after application because it prevents over watering leading to a reduced effectiveness.
- When applying GreenClean Granular to soil, gravel or other similar media, incorporate the application of GreenClean Granular into the first inch of substrate for optimum effectiveness.
- After application, do not allow undiluted granules to remain in an area where humans or animals are exposed.
- Non-target plants will suffer contact burn if undiluted granules are accidentally spilled on them.
- Do not tank mix with aquatic herbicides or algaecides containing copper or bromides. Always apply GreenClean Granular at least one day prior to the application of these products.

APPLICATION METHODS

Spreading/Broadcasting: Broadcast GreenClean Granular with a mechanical spreader or by hand. A lawn spreader or any other applicator that will insure uniform coverage is acceptable.

Spot Treatment: Apply GreenClean Granular directly over the infested area. Re-treatment is required when heavy growth occurs.

Filled by weight not by volume. Product may settle after packaging. NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions. Failure to use as directed or changes in water conditions not consistent with label may result in loss or injury to aquatic life. BioSafe Systems LLC is not responsible for any loss of aquatic life.

Eliminates Algae and Keeps Water Clean.

For Contained Water such as Water Gardens, Fountains, Ornamental Ponds and Waterfalls

Adds oxygen to the water as it works!

OPEN
for Complete
Directions

YOUR POND SIZE	CURATIVE RATE
50 gallons	1 Tablespoon
100 gallons	1.5 Tablespoons
500 gallons	0.5 Cup
1,000 gallons	1 Cup
5,000 gallons	5 Cups
10,000 gallons	10 Cups

GreenClean is Easy to Use.

For Treating String Algae:

- 1) Turn off circulation
- 2) Apply GreenClean Granular to affected areas – including waterfalls and streams
- 3) Turn circulation back on after 10-20 minutes

For Pond Cleaning:

- 1) Drain pond (remove fish & plants)
- 2) Apply GreenClean Granular to all surfaces
- 3) Rinse with water after 10-20 minutes
- 4) Drain pond
- 5) Re-fill pond (replace fish & plants after de-chlorinating as appropriate)

For Treating Green Water Algae:

- 1) Shock with GreenClean Granular at the high curative rate
- 2) Treat as needed once per week with GreenClean Granular at the low curative rate in conjunction with water conditioners

FIRST AID	
if in eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
if on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
if swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
if inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for treatment advice.
<p>HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-222-1222 for emergency medical treatment information. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. See inside and base panels for additional precautionary statements and directions for use.</p>	

Net Weight: 8 lbs

- Eliminates algae and keeps water clean.
- Adds oxygen to the water as it works.
- For use in water features containing live fish & plants.
- For indoor or outdoor residential uses.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply to water body margins when amphibian eggs or young are present.

WATER TREATMENT

Use GreenClean Granular to treat, control, and prevent a broad spectrum of algae. Effects of treatment are immediately apparent (bubbling, bleaching/discoloration of algae, floating of dead organic matter). Waters treated with GreenClean Granular are permissible to be used without interruption.

STRING ALGAE IN WATER AND ON ORNAMENTAL WATERFALLS/STREAMS

POND SIZE	CURATIVE RATE
50 gallons	1 Tablespoon
100 gallons	1.5 Tablespoons
500 gallons	0.5 Cup
1,000 gallons	1 Cup
5,000 gallons	5 Cups
10,000 gallons	10 Cups

Tips for Treating String Algae

- Step 1:** Turn off circulation
- Step 2:** Apply GreenClean Granular to affected areas; including waterfalls and streams
- Step 3:** Turn circulation back on after 10-20 minutes.

POND CLEANING

Make granular applications over a wet surface

HEAVY GROWTH 4-6 Cups per 1,000 square feet
LOW GROWTH 2-4 Cups per 1,000 square feet

Tips for Pond Cleaning

- Step 1:** Drain pond (remove fish & plants).
- Step 2:** Apply GreenClean Granular to all surfaces.
- Step 3:** Rinse with water after 10-20 minutes.
- Step 4:** Drain pond.
- Step 5:** Re-fill pond (replace fish & plants after de-chlorinating as appropriate).

GREEN WATER ALGAE IN PONDS

POND SIZE	HIGH CURATIVE RATE	LOW CURATIVE RATE
50 gallons	1 Tablespoon	0.5 teaspoon
100 gallons	1.5 Tablespoons	1 teaspoon
500 gallons	0.5 Cup	1.5 Tablespoons
1,000 gallons	1 Cup	3 Tablespoons
5,000 gallons	5 Cups	1 Cup
10,000 gallons	10 Cups	2 Cups

Tips for Treating Green Water Algae

- Step 1:** Shock with GreenClean Granular at the high curative rate.
- Step 2:** Treat as needed once per week with GreenClean Granular at the low curative rate in conjunction with water conditioners (such as beneficial bacteria).

GENERAL TREATMENT NOTES

- Re-treat areas if re-growth begins to appear. Allow 48 hours between consecutive treatments.
- GreenClean Granular treatments are successful when contact of the pesticide is made with the algae.

- Non-target plants will suffer contact burn if undiluted granules are accidentally spilled on them.
- Apply early in the day under calm, sunny conditions, and when water temperatures are warm. Sunlight and higher temperatures both enhance GreenClean Granular activity; GreenClean Granular will work more slowly in colder water.
- If using in conjunction with other water conditioners (such as bacteria or enzymes), always apply GreenClean Granular first and wait several hours before adding other products.
- After application, do not allow undiluted granules to remain in an area where humans or animals are exposed.
- Do not tank mix with aquatic herbicides or algaecides containing copper or bromides. Always apply GreenClean Granular at least one day prior to the application of these products.
- Skim any dead algae and organic matter that rises to the water's surface after treatment.
- When treating surface mats and blooms, it is possible that GreenClean Granular will not penetrate the water column below the infested area, and a second application is then required for treating any bottom growing algae.

APPLICATION METHODS

Spreading/Broadcasting: Broadcast GreenClean Granular with a mechanical spreader or by hand, directly on the water surface. A lawn spreader or any other applicator that will insure uniform coverage is acceptable.

Spot Treatment: Apply GreenClean Granular directly over the infested area. Re-treatment is required when heavy growth occurs.

SURFACE TREATMENT

Use GreenClean Granular on all listed non-painted surfaces, to prevent and control algae, moss, slime molds and their spores, and the odors and conditions that these organisms cause.

NON-PAINTED SURFACES

Make granular applications over a wet surface

Heavy Growth	Low Growth
4-6 Cups per 1,000 square feet	2-4 Cups per 1,000 square feet
